

## Stabilizer Instrument: Tube Replacement

**Stabilizer Handle Assembly:** CT-0188 & CT-0197

**Replacement Tubes:** CT-0186, CT-0195 & CT-0329

## **INSTRUCTIONS:**

- 1. Loosen the Collet on the Handle Assembly. Hold the Top Knob [A] firmly with one hand and turn the Bottom Knob [B] counterclockwise with the other hand to loosen the *Collet* [D].
- 2. Pull the used Tube [C] out from the Collet [D] and discard.
- 3. Insert the slotted end of a new, replacement Tube into the loosened Collet of the Handle.
- 4. Rotate the tube until the slots seat fully into the Collet and the Laser Mark [E] on the tube is immediately adjacent the Collet.
- 5. Tighten the Collet on the Handle Assembly. Hold the Top Knob firmly with one hand and tighten (turn clockwise) the Bottom Knob with the other hand until tube is secure.
